EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Christopher McWhinney on April 28, 2006.

The application has been amended as follows:

In the Claims:

In claim 1 line 8, delete "in parallel" and insert --simultaneously--.

In claim 10 line 10, delete "in parallel" and insert --simultaneously--.

In claim 10 line 11, delete "in".

In claim 10 line 12, delete "parallel" and insert --simultaneously--.

The following is an examiner's statement of reasons for allowance:

It is well known in the art to utilize HF plasma to remove oxide materials from a film as indicated by Blackwood. It is also well known to utilize separate hydrogen and fluorine radicals to etch films as taught by Jimbo. Kaneko also teaches of removing oxide films by simultaneously applying hydrogen and fluorine radicals and terminating both, utilizing fluorine radicals and terminating, and then utilizing hydrogen and terminating (Figure 1). However, the prior art references do not teach providing both fluorine and hydrogen radicals simultaneously

followed by the first terminating the fluorine radicals followed by the termination of the hydrogen radicals.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
